Project	6006 Garden Hill Fire Station Deficiencies		
Department	Corporate Facilities		
Version	04 Approved by Council	Year	2024

Description

Project Description

To repair the current deficiencies of the water cistern and paving of the training area.

Project Justification

The Water cistern that is located at the facility was installed improperly and freezes regularly during the winter months. This is used as auxiliary water supply.

The area to the south of the station was previously a recreational tennis court and has not been maintained as a recreation area for some years, to allow for the development of a training area. Fencing upgrades are being sought through operating budgets, but in order to maximize this area if needs to be paved. Training drills consist of extrication, hazardous waste management, fire control and other aspects. This is the only designated training area for fire teams in the Municipality.
